Appn. Filed:

Applicant: James Richard Warner

Appn. Title: Collapsible Bookstand

Examiner/GAU:

Mailed: March 9, 2004

At: Henderson, Nv.

**Information Disclosure Statement**

Commissioner for Patents  
Washington, District of Columbia 20231

Sir:

Attached is a completed Form PTO/SB/08(A&B) and copies of the pertinent parts of the references cited Thereon.

Johnson, Howell , Neuwirth and Spiro shows a bookstand that has an adjustable rear support, supporting a pyramid design. Snabria shows a collapsible design.

However, none of these references demonstrate an all encompassing bookstand. For example, the aforementioned designs that have a rear support ether do not have the convenience of collapsing fully into a flat position, whereas Spiro's independent claim 13 states " an approximate parallel configuration, or require the user to assemble and adjust the bookstand before and after use, wherein recited independent claim 5 of this applicant the support arm is affixed to a rotational hollow cylindrical shape , therefore enable the stand to collapse fully and does not require assembly. In addition, the previously mentioned designs are in a pyramid configuration comprising of several pieces as recited in Spiro's independent claims 2, 6, 9, and 12. This applicant as recited in dependent claim 1, is designed in a linear "M" fame having substantially different components.

Also, none of the references known show any rotational hollow cylindrical, wherein a support is affixed, to provide the bookstand with a collapsible or reclined position.

Very Respectfully,

Applicant: James Richard Warner
